YOUR SMART CHOICE FOR BUILDINGS & FACILITIES 5

YOUR SMART CHOICE IN OFFICE & DISTRIBUTION 6

YOUR SMART CHOICE FOR THE WASHROOM 7

YOUR SMART CHOICE FOR DESIGN & DEVELOPMENT LABORATORIES 8

SAFETY IS N° 1 PRIORITY

Before starting any kind of maintenance, you need to be sure to protect yourself from any risk. **A couple of minutes using a checklist can save your life.**

TOP TO BOTTOM CHECK

Head

Head protection (hard hat) is required when engaged in hazardous work such as construction, working from heights and in any environment with danger of potential falling objects.

Hearing

Protect your hears from noise, vibrations and particles that can temporarily or permanently cause hearing loss during your job.

Eyes and Face

Appropriate eyes and face protection such as safety glasses, goggles and face shields must be used to protect against the hazard of flying particles, molten metals, chemicals and corrosive liquids and gases.

Respirators

Respiratory protection should be used every time there could be the risk of inhalation of hazardous gases, vapors or particles.

Body

High visibility vests are the right choice to be visible in a high traffic environment, while aprons can protect you from chemical splashes.

Hand

According to the hazard level of the environment (high temperature, chemicals, sharp objetcs...) chose the right gloves to protect your hands.

Foot

Toe guards, electrical conductive, electrical hazard or safety-toe footwear are just few option of foot protection that need to be appropriate for the environment risk level.
